

Are You Ready for AI?

A modular Power Conversion System (PCS) - like CE+T's Prisma platform - changes your energy set up from a rigid utility room into a flexible asset that grows naturally alongside your business.

Where Existing Power Systems Fall Short

You buy an expensive power infrastructure built to last 20 years, but the tech inside it becomes obsolete in just 3 to 5. When it's time to upgrade to modern, high-revenue AI systems, your building runs out of juice—**forcing you into costly, disruptive renovations that stall your business growth.**

How Prisma Delivers

Real Organic Scaling

Keep your
business completely
future-proof

Growth That Fits Your Budget

buy equipment
when you need it

Use Energy Savings to Fund Your Future

Your power system
should actively earn
you money

Smart Accounting for Continuous Success

Retire old power modules,
replace with higher
revenue technology

Here are your options

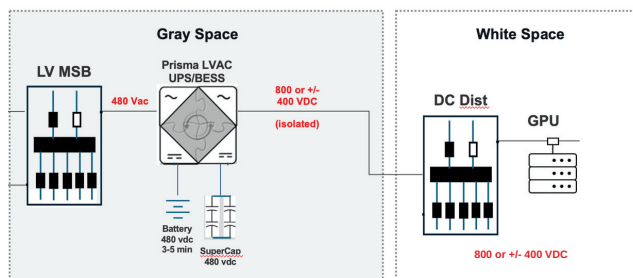

CE+T Prisma Storage

- 800 VDC Capable
- Up to 5MW systems
- Hot Swap Modular
- "Pay as you grow"
- Organic Funding path
- Plug and Play

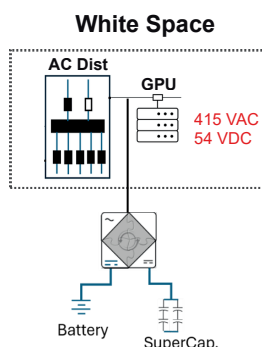

Gray Space Solutions

- Immediate ROI Scaling
- Eliminate upfront Capex
- Organic Expansion
- Eliminates GPU Bursts/Base Load Variation
- Expand UPS simply
- Eliminate "Rip and Replace" of legacy systems

White Space Solutions

- Organic Expansion tied to new racks
- Upstream Defense: Protects MV system
- Downstream Shield: Safeguard PSU's
- Row Level Sidecar
- Universal Install Capable
- Smallest Footprint in the Industry
